FLORIDA **Tropicals**

A vibrant tropical scene featuring lush green palm fronds in the foreground on the left. In the background, a sandy beach meets the ocean with gentle waves under a bright, golden sky. The overall atmosphere is warm and inviting.

ENJOY THE BEAUTY OF
Tropicals from South Florida

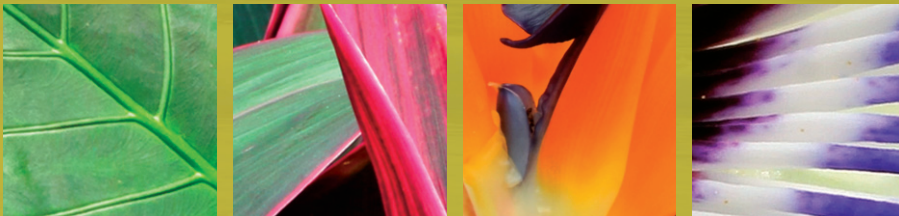

We offer the largest selection of premium quality foliage and flowering tropical plants from our network of superior growers based in south Florida. We supply foliage for interior needs as well as large tropicals for outdoor patio containers and money-making summer color.

Our network of growers offers high quality plants with clean foliage, heavy caliper and that burst with color. This makes them ready for sale when they arrive. From 6-inch potted foliage to large specimen trees, we have the selection you need for profit-driving programs.

Florida Grower Network

Our team visits our growers regularly to ensure the plants are up to our standards. Weekly updated photographs are sent throughout spring to show growth progress. All orders are reviewed by the grower prior to shipping, and information about any product which is not up to our specifications will be relayed to you before delivery.

ORDERING TERM

- Our trucks ship late March through June, but place orders early for best selection and availability.
- Best selection of material will be before Mother's Day. After Mother's Day selection will be limited.
- Orders must be submitted two full weeks prior to desired ship week to allow adequate time for routing.
- A full truck has the capacity to hold 4,200 cubes.
- Minimum orders are 400 cubes per drop per vendor. What does 400 cubes look like? 150, 10" pots or 100, 10" pots and 250, 6" or 15, 14" pots and 95, 10" pots. All items have a cube rate associated with them so it's easy to figure out your total cubes while ordering. 400 cubes is preferred from one vendor but can be split among two, the end result must be 400 cubes for the truck to make the drop.
- Tags and or UPC labels are available from some of our vendors, at an additional charge. Please ask your sales representative which vendors can supply. Some vendors can apply the tags while most may be able to only print them and drop them in the sleeved plants.
- While we as a broker strive to provide quality product from top quality suppliers we all know that mistakes happen or in some instances material might get damaged. All quality claims or damages must be reported within 48 hours, photos will be required and all damages or shortages must also be noted on the Bill of Lading.

DELIVERY

McHutchison has reliable transportation on our temperature-controlled trucks. All trucks are routed internally so our customer support staff can track your order throughout the shipment and provide you with accurate delivery times. Since our team handles all the logistics and freight, you will not have any C.O.D. deliveries. Our trucks load at the nurseries based upon the drop sequence, ensuring the most economical travel and least amount of time on the truck. With a direct route from our vendor to your greenhouse, we have fewer shortages and less breakage than materials that go through a cross docking network.
